

DESCRIPTION

A proprietary selection of fast acting water based ink cleaners and natural grit to create a heavy duty scrub for complete cleaning of anilox rolls.

Can be used in or out of press.
Restores anilox roll cells to maximum volume.

Directions: Protect skin from contact before use. Cut spout to a suitable opening. Shake before using. Hold bottle upside down and use a 1 inch line directly onto roller. Scrub in a circular motion with an appropriate sponge or cloth. Agitate in a circular or side to side motion to loosen ink. Turn rag as needed to pick up and remove from plugged cells. For dry or heavy build up. rub hard and re-apply as needed. Repeat until roll looks clean and no ink comes off onto rag. Rinse roll with cool water until all residue is removed. If faster drying is required, Wipe roller dry with a clean dry rag or towel.
Keep container closed when not in use.

FOR PROFESSIONAL USE ONLY
